

Manurewa High School

BYOD & eLearning 2020

What is BYOD?

BYOD is 'Bring Your Own Device'. Digital devices are a critical learning tool, utilised by students on a global scale. Teachers are shifting their learning programmes to meet the needs of the 21st century digital citizen. Manurewa High School's eLearning (electronic learning) programme, requires all Year students to have a laptop in 2020. The device will be used every day at school and at home to assist with learning and achievement.

What type of device is needed?

After much research and robust discussions with parents, students, teachers and IT specialists, we have selected the best device for purchase: Laptop minimum requirements (4GB, 128GB SSD, LENOVA 100e -Windows). This device is lightweight and versatile while providing maximum performance for students of all year levels. The device also comes with Microsoft Windows 10, Wireless capability, Webcam, Microphone and a 5+hour battery life. Antivirus and web-filtering software will also be installed.

We have teamed up with a PB Technology and Noel Leeming Manukau to put together a complete package, which includes the device, carry case, 3-year total warranty and 3-year damage and loss insurance. There are several payment options available, including buying outright, finance with 1-3 payment terms, and financial hardship grants.

Can my child bring a device we already own?

Yes, as long as it meets the minimum requirements stated above. Please note we are a Microsoft school, so devices which are the equivalent of Google Chrome will be a little more difficult to support on our network.

Where can I find further information?

You can keep up to date with all of our eLearning news on the School website, Facebook page and information coming via the email address on your enrolment form.

If you have any questions about the programme, device or payment then please contact us.
